

LIST OF DISTINCTIVE DISPLAYS MODELING PROJECTS

The list of Distinctive Displays's scale models are broken down into 6 categories. They are:

1.0 ARCHITECTURAL MODELS

They provide a vivid and realistic means to convey the scope and esthetic appeal of development projects. They are ideal for accurate photographic representations that are useful for advertising layouts and press releases as well as for leasing/sales office use and other permanent displays.

2.0 OFFSHORE FACILITY MODELS

These models create dramatic lobby displays as well as providing a dynamic means of understanding and communicating the complex arrangement and function of these extraordinary technological entities.

3.0 INDUSTRIAL EQUIPMENT MODELS

These models are a powerful means of describing and illustrating the function of large integrated operations as well as a way of transforming large heavy equipment into manageable scale displays for trade shows and client presentations.

4.0 MUSEUM DISPLAY MODELS

These models bring history alive with a fascinating array of colors, textures and techniques. They generate enthusiasm and appreciation for the genius and determination of those that created these historic projects; most of which are rapidly passing from view.

5.0 SUBSEA / SUBSURFACE MODELS

These model project a glimpse into regions unavailable to direct view by humans. They communicate the development and operation of projects on the cutting edge of scientific development.

6.0 MINI PROMOTIONAL MODELS

These models have all the advantages of sophisticated scale models with the additional asset of being reproducible in large quantities and inexpensive enough to be high quality promotional gifts for numerous clients.
